United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and Lester D. Johnson, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census. U.S. Imports of Merchandise for Consumption, Report FT 125, May 1964. Washington, D.C. August 1964.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or any Department of Commerce field office. Price: $8 per year domestic, $2 additional for foreign mailing, $1 single copy.

NOTICE TO USERS WHO DO NOT FIND NEEDED TSUSA COMMODITY DETAIL IN REPORT FT 125

Monthly U.S. import data in Tariff Schedules of the United States Annotated commodity by country of origin detail, although no longer shown separately in published reports for many TSUSA commodities, continues to be readily available, as follows:

1. Quick-copy subscription service, TSUSA by country data for individual TSUSA subparts -

   a. Description of the service.

      Monthly TSUSA by country data will be supplied on a subscription basis in the form of copies of excerpts for individual TSUSA subparts from a machine tabulation (IM-146). Alphabetic descriptions for TSUSA commodity and country, similar to those formerly shown in FT 110, are provided in the tabulation. The subscription price per subpart is $8.25 for the eleven months February through December 1964 (slightly higher for a few of the longer subparts). An order blank showing complete subscription information will be found on page 117 of the publication entitled **Changes in Presentation of the U.S. Import Statistics,** mailed earlier this year to all subscribers to the FT 110 and FT 120. A sample illustrating the form and content of the reports is also shown in this publication. An order blank, (or a complete copy of the publication describing the changes in program) may also be obtained on request from the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

   b. Differences between the new subscription method and the former publication method of making TSUSA by country information available.

      (1) Complete commodity by country information is tabulated for the new quick-copy service. In FT 110, commodity by country items with values less than $10,000 were "basketized" and shown for each commodity in a total identified only as "OTH CTY."

      (2) Copies of individual subpart data will be received by subscribers to the quick-copy service promptly after the first availability of a month's data. The printing time required in preparing FT 110 involved a delay of several weeks in its distribution.

      (3) The quick-copy service supplies data in terms of general imports, as well as imports for consumption. Report No. FT 110 furnished imports for consumption, only.

      (4) Data in the quick-copy service is arranged in TSUSA number order. In the FT 110, TSUSA data was shown within the framework of the 3-digit groups of the SITC.

      (5) The new service makes the complete detail described in (1) above available for the particular commodities of the subscriber's interest, at a nominal cost to him. The substitution of the FT 125 for the FT 110 provides a publication covering the full range of commodities, for general analytical use and for comparisons with other data series, but avoids the distribution of the complete TSUSA detail for all commodities to individual subscribers who are interested in the data for only a few.

2. Reference service, without cost, for complete commodity by country detail on all TSUSA numbers.

   Tabulation IM-146, showing complete commodity by country of origin detail for all TSUSA numbers in the same form as described above for the quick-copy service, will be available for free reference use, promptly after the first availability of the data for each month, at the following locations:

Annual U.S. import data in TSUSA commodity by country detail will be available, according to present plans, in the form of an annual published report for distribution by the Government Printing Office.

The Foreign Trade Division will welcome comments or suggestions when users have had an opportunity to evaluate the new program.

SPECIAL REPORTS ARRANGED FOR ON A COST TO SUBSCRIBER BASIS

Special reports contracted for on a cost basis are listed in current publications so that all users of foreign trade statistics may be informed of the type of reports being prepared and the cost involved. These special reports cover foreign trade data in greater detail or in different arrangement than that available in the regularly published statistics, or supply at an early date information which will be published later. The entire cost of the special work required to compile or duplicate the information from the basic data available in the Bureau is charged to the subscriber.

The reports listed below are those which have been initiated since the last published list, covering statistics related to import data. Special reports covering statistics related to other types of foreign trade data are listed in the current foreign trade reports covering such data. Reports previously contracted for are listed in issues of Report FT 110 (published through the January 1964 issue and now discontinued). Additional subscribers may purchase any special reports listed in any issue. The maximum payment required in each case will be at the rate shown in the list. Unless otherwise indicated, the prices listed cover subscriptions through the end of the calendar year. Where the period covered is less than a full calendar year, the actual period covered is indicated. When more than one user subscribes to one of these reports at the beginning of a calendar year, the cost is pro-rated among all subscribers. If a new subscriber requests the report during the calendar year, the cost to him in most cases is the same as the cost to each original subscriber.

Cost-sharing arrangements with the original subscribers are sometimes suggested in such cases when the report is a costly one. Information furnished on a cost basis usually will not be publicly released by the Bureau without charge or at a reduced rate until after six months, but exceptions are made in the case of data which the Bureau regards as of general interest.

Subscribers who are interested in information which is not obtainable from the regularly published foreign trade statistics reports, and not listed as a special report, may inquire as to the possibility of obtaining the desired information and request a cost estimate for initiating a new special report. The Bureau's policy with regard to services furnished at cost is described more fully in an article entitled "Policy in Regard to Release of Foreign Trade and Shipping Statistics Reports Prepared for Private Organizations on a Cost Basis" in the November 1962 issue of Report FT 110. Reprints describing these policies are available upon request to the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Inquiries regarding the possibility of obtaining unpublished data, or requests for copies of existing special reports, should also be addressed to the Foreign Trade Division.

SPECIAL REPORTS ARRANGED FOR ON A COST TO SUBSCRIBER BASIS—Continued

Beginning with the February 1964 import statistics, import data in Tariff Schedules of the United States Annotated (TSUSA) detail are no longer being released in publication form, as explained in a special Bureau of the Census publication entitled "Changes in Presentation of United States Import Statistics Effective 1964." However, effective with the February 1964 statistics, monthly tabulation excerpts showing TSUSA commodity by country of origin data for TSUSA subparts are quick-copied from machine tabulation IM 146 and supplied by the Bureau of the Census on a cost basis. These reports will reach subscribers promptly after the compilation of each month's data, much earlier than it was possible to furnish the printed report in which the information was formerly contained. The subscription price per TSUSA subpart (or part) is $8.25 for the February - December 1964 period, except that for a few TSUSA subparts which contain a large number of TSUSA numbers the price is slightly higher. The order blank for the subscription service identifies these longer subparts and gives the subscription price for each. The TSUSA number range for each subpart (or part) is shown in the order blank for the convenience of users in identifying the particular subparts in which they are interested.

Complete detail regarding this quick-copy service is contained in the special publication entitled "Changes in Presentation of United States Import Statistics Effective 1964." Copies of the special publication and order blanks are available upon request to the Foreign Trade Division. Special reports contracted for on this basis are not listed in current publications since the cost is the same to each subscriber of a TSUSA subpart.

The special reports listed below and in future issues of this report cover more detailed data or different arrangements of data from that being supplied in the quick-copy service. Because they are individually tailored, their cost is higher.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments between the United States, its outlying possessions and Puerto Rico are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouses for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouses.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouses, bonded manufacturing warehouses, and bonded smelting and refining warehouses immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. 985. Effective with statistics for January 1962, information is being compiled on United States general imports of merchandise by air. These data are published in Reports FT 380, FT 390 and FT 986. A more complete description of the coverage and presentation of the various types of statistics mentioned above will be found in the introductions to the specified reports.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries. This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity Classification

Effective with the statistics for February 1964, the basic import data, which are initially compiled in terms of the commodity classifications in Tariff Schedules of the United States Annotated (TSUSA), are being presented in this report in terms of a re-arranged commodity classification system, Schedule A, Revised, Statistical Classification of Commodities Imported Into the United States, which is based on the Standard International Trade Classification, Revised (SITC)[2]. Schedule A, Revised was constructed by the Bureau of the Census in order to

[1] For shipments by vessel, merchondise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inword Customs manifest for the vessel).

[2] United Nations Statistical Papers, Series M, No. 34, 1961.

provide for the summarization of data for the approximately 10,000 TSUSA classifications into about 2,200 commodity groupings which would be meaningful in terms of commodities important in the United States import trade and, at the same time, to provide data in terms of the Standard International Trade Classification outline which are comparable, insofar as possible, to the foreign trade statistics compiled by other trading nations.

The amount and kind of detail in Schedule A, Revised was determined on the basis of the estimated magnitude of trade in the various TSUSA commodities arranged within the framework of the SITC. The details of the Schedule A, Revised classification system are not considered to be final, and users are invited to send comments or requests for changes to the Foreign Trade Division, Bureau of the Census. These requests will be considered in connection with possible modifications of Schedule A, Revised, to be effective with January 1965 statistics. In order to receive consideration, requests for changes should be received by October 1, 1964.

A general description of Schedule A, Revised and its relation to the TSUSA classifications is presented in a special publication entitled "Changes in Presentation of United States Import Statistics Effective 1964." This publication also contains an outline of Schedule A, Revised which shows the TSUSA numbers included in the 7-digit Schedule A, Revised codes and gives abbreviated descriptions for the 7-digit classifications and for the 1, 2, 3, and 4-digit levels of summarization. (Complete descriptions for the 1, 2, and 3-digit levels are presented in Table 1 of this Report FT 125.) Descriptions at the 5-digit level are not furnished in the special publication since 5-digit summarizations of data are not presented in Report No. FT-125. However, users may total the data for 7-digit classifications having common first five digits to obtain summaries at the 5-digit level. For the convenience of users who wish to locate individual TSUSA numbers in the new classification system, the above-mentioned special publication contains a list in TSUSA number arrangement showing the Schedule A, Revised codes to which the TSUSA numbers were assigned. Further information regarding the SITC, the comparability of Schedule A, Revised to the SITC, and the disposition of SITC classifications in Schedule A, Revised is also contained in the special publication on changes in presentation of import statistics.

Some TSUSA Number Assignments to 3-digit SITC Groups Changed by Schedule A, Revised

For the period September 1963 through March 1964, the import statistics were issued in terms of TSUSA codes arranged within 3-digit SITC group codes. A correlation between the SITC group codes and the TSUSA numbers was furnished with the September 1963 statistics. With the adoption of Schedule A, Revised, some changes have been made in the TSUSA number assignments to SITC group codes as shown in the above-mentioned correlation. As a result, there are some differences between the data previously released for these 3-digit codes and the Schedule A, Revised data now being published for the same 3-digit codes. A special notice regarding these changes appears on page 3 of the February 1964 issue of this report. Further information and a list showing the 3-digit codes for which the assignment of TSUSA numbers was changed are included in the special publication entitled "Changes in Presentation of United States Import Statistics Effective 1964."

Availability of TSUSA Data

Information in terms of the 7-digit TSUSA classifications, under which the import statistics are initially compiled, is not presented as such in this report. (A few Schedule A, Revised classifications represent individual TSUSA classifications.) However, current monthly statistics in TSUSA number by country of origin arrangement for both general imports and imports for consumption are contained in a machine tabulation, identified as IM 146, copies of which are available for use at the following reference locations: Department of Commerce Field Offices in Boston, Chicago, Detroit, Houston, Los Angeles, New Orleans, New York, Philadelphia, and Seattle.

Users who wish to do so may obtain data for individual TSUSA parts or subparts in the form of copies of excerpts from the above-mentioned tabulation at a nominal cost. A sample report which illustrates the content and arrangement of the excerpts, information regarding subscription prices, and an order blank for convenience in placing subscriptions for this special service are included in the special publication "Changes in Presentation of United States Import Statistics Effective 1964" and may also be obtained from the Bureau of the Census upon request.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined or manufactured. In instances where it is known that the country of origin cannot be determined, the transactions are credited to the country of shipment.

In Table 2 of this report, which presents data in commodity by country arrangement, and in Table 4, in country by commodity arrangement, countries are presented in the order of Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands or other areas considered to be a part of the country for statistical purposes. Schedule C is published as Annex B in Tariff Schedules of the United States Annotated. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

Table 3 of this report presents data on imports from major geographic trading areas in terms of 1, 2, 3, and 4-digit commodity classifications. The areas, in general, represent groupings of individual Schedule C countries. A list showing the trading areas and the individual countries included in each area appears in the February 1964 issue of this report. Also, following Table 4, there is an index of areas and countries which is footnoted to show the individual countries included in the various areas.

ESTIMATED DATA FOR LOW-VALUED IMPORTS

Since January 1958, data on imports valued under $100 reported on formal immediate consumption entries and imports reported on informal entries (by definition, valued not more than $250) have been estimated from a one percent sample and reported under an arbitrary commodity number (Schedule A number 9999 500 from January 1958 through August 1963, TSUSA number 999.9500 from September through December 1963). These estimates have been excluded from other individual commodity classifications. In addition, effective January 1963, estimated data on warehouse withdrawals for consumption valued under $100 are also included with the other low-valued imports under the above-mentioned arbitrary commodity numbers and excluded from the other individual commodity classifications. In this report, value estimates based on a one-percent sample of these low-valued shipments are shown separately under commodity codes 9900000, 9900, 990 and 99, and are also included in the section 9 total, the country and area totals and the global total. The statistics for commodity codes from which the low-valued shipments are excluded are undercounted to the extent that such "low-valued" shipments of the particular commodity are made. The total value so excluded amounts to about one percent of the monthly import total. Although subject to considerable variability,[3] particularly where the estimated amounts are relatively small, these estimates for low-valued imports may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual areas or countries.

For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. In Table 2, which contains seven-digit commodity by country data, the number of documents in the sample is shown by country under commodity code 9900000 in the net quantity columns. In the tables containing data in area by commodity and country by commodity arrangements, figures indicating the number in sample for the current month and the cumulative year to date are shown, respectively, following the description for commodity codes 99, 990, and 9900. The number in sample can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two-times-out-of-three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between

[1] The actual value of shipments cannot be less than 1/100 of the estimated amount shown in the report. Figures in this column can be ignored if use of them for a particular total would bring the lower limit below 1/100 of the estimate.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

[3] The estimated total for low-valued imports reported under commodity number 9900000 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9900000 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes.

The following will illustrate the use of the table:

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line 40-49, one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,559,689 for the fully compiled data plus an estimate of $397,500 for group 990 based upon 75 shipments in the sample would be between $15,855,189 ($15,957,189 reduced by $102,000) and $16,077,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

REVISIONS IN PREVIOUS MONTHS' REPORTS

Prior to January 1964, revisions to data for earlier months of the current year and the previous year were published in the March, June, September, and December issues of Report No. FT 110. Under the revision policy which became effective January 1964, it is planned that corrections to the prior year's statistics will be published only in the June issue of this report while corrections to the current year's statistics will be published only in the December issue of this report. It is possible that individual exceptions to this policy may be made where extremely significant revisions are involved. Corrections for the current or previous years which are not published in this report will be held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for the particular year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) which were formerly included in a separate publication, Foreign Trade Statistics Notes, are now being included as special announcements in current issues of this report and other statistical publications. Copies of such announcements are also attached to reference copies of tabulations, where appropriate. Reports providing additional detail compiled but not published can be obtained on a cost basis. For further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

[1]See SITC group 001.

[2]The SITC 3-digit description used here has been modified somewhat from that published in the United Nations' publication (Statistical Papers Series M No. 34). This modification does not change the content of the United Nations' class.

[3]Certain uranium bearing material, formerly classified under SITC group 286, is included in SITC group 515 effective with September 1963 statistics.

[4]Not included in merchandise statistics.

[5]Code arbitrarily established for presentation of United States foreign trade statistics.

[6]Not classified separately in import statistics.

[7]Included in SITC group 003 prior to September 1963.

[8]See SITC group 896; reported separately prior to September 1963.
